HDDR-3.5S

MobileRack 3.5" SATA Server Caddie

Introduction

Are you looking for an easy way to remove your Hot Swappable* SATA interface Hard Drives from your Server in a safe and secure way?

The new Dynamode **HDDR-3.5S** is a feature rich, low cost removable 3.5" SATA interface Caddie that comes in two parts. The Caddie cradle simply fits into any existing 5.25" drive bay and is connected to the Hard Disk interface and power supply the normal way. Insert your existing 3.5" SATA Hard Disk into the removable drawer and this simply slides into the 5.25" bay. It's that simple!

Security is of importance and Dynamode designers have incorporated a secure locking system to prevent accident or deliberate removal of the drive and features a patent clamping system for secure connection to the SATA interface with minimal effort.

So for a cost effective solution for all your removable Server operations look no further than the Dynamode *MobileRack* series.
