Dynamode

MEDIA STREAMER PLAYER
with 11n Wireless
DYN218

WITH REMOTE CONTROL

Home Cinema

The exciting DYN218 digital Media Player is your ticket to the next generation of High Definition movies, audio and online content, with the added capability of built-in Wireless, Ethernet and local area data sharing - all in a stylish and compact design.

Upscale and watch online content from the likes of YouTube™ and BBC iPlayer™. Transfer your existing movies and other content and stream across your Network to attached computers, TVs and other multimedia devices whenever you want. Simply add your existing 3.5 inch Hard Disk to the DYN218 and you'll have a business-class network attached storage (NAS) device allowing everyone on your network to securely save, retrieve and of course backup to a central location whenever you want.

And if that is not enough, the DYN218 features a built-in 300Mbps access point, built-in 10/100Mbps Ethernet port to allow either wireless or wired LAN connectivity. Need USB host connectivity? Not a problem. Featured is a dual port USB2.0 hub allowing USB memory sticks for example to be played, copied whenever you feel like it.

Finally, the DYN218 allows for almost any scenario of data output. From the last HDMI 1080p, to legacy Composite Video, together with the option of superb quality sound to your HiFi setup, courtesy of integral optical (TOSLINK) and legacy co-axial connectivity.
