**Dynamode**

The exciting DYN218 digital Media Player is your ticket to the next generation of High Definition movies, audio and online content, with the added capability of built-in Wireless, Ethernet and local area data sharing - all in a stylish and compact design.

Upload and watch online content from the likes of YouTube™ and BBC iPlayer™. Transfer your existing movies and other content and stream across your network to attached computers, TVs and other multimedia devices whenever you want. Simply add your existing 3.5 inch Hard Disk to the DYN218 and you'll have a business-class network attached storage (NAS) device allowing everyone on your network to securely save, retrieve and of course backup to a central location wherever you want.

**FEATURES**
