The exciting DVV-10 digital Media Player is your ticket to the next generation of High Definition movies, audio and online content, with the added capability of Ethernet and local area data sharing - all in a stylish and compact design.

Upscale and watch online content from the likes of YouTube™ and BBC iPlayer™. Transfer your existing movies and other content and stream across your Network to attached computers, TVs and other multimedia devices whenever you want. Simply add your existing 3.5 inch Hard Disk to the DVV-10 and you'll have a business-class network attached storage (NAS) device allowing everyone on your network to securely save, retrieve and of course backup to a central location whenever you want.

And if that is not enough, the DVV-10 features a built-in 10/100Mbps Ethernet port to allow wired LAN connectivity. Need USB host connectivity? Not a problem. Featured is a dual port USB2.0 hub allowing USB memory sticks for example to be played, copied whenever you feel like it.

Finally, the DVV-10 allows for almost any scenario of data output. From the last HDMI 1080p, to legacy Composite Video, together with the option of superb quality sound to your HiFi setup, courtesy of integral optical (TOSLINK) and legacy co-axial connectivity.
