Work Hard, Play Hard Online Gaming Support
by Dynamode

Introduction

Not satisfied with the speed of your Wireless connection on your PC or Laptop? Or is running network cabling not an option at your location? Dynamode has the answer for you!

The new **HomePlug eXtreme** is the latest 85Mbps high speed network adapter that allows anyone to simply run their network and connect computers together using existing electrical cabling around the home or office!

Using reverse frequency technology, the Dynamode HomePlug allows for example PCs to be used anywhere in the building by simply plugging in a HomePlug into any available wall socket and be directly connected to the Internet for example by plugging another HomePlug into your existing Broadband Router.

The HomePlug eXtreme is perfect also for connecting Game Consoles to the Internet (e.g. XBOXLive®), IP Network Cameras or Printer Servers quickly and without any the hassle of cable installation.
