R-ADSL-C4WG2

802.11g Wireless ADSL2+ Router Modem

Introduction

Looking for a cost effective combined Wireless and ADSL solution with advanced features at a low price?

The new Dynamode **R-ADSL-C4WG2** is the ideal answer. The stylish low profile design hides away some impressive features including ADSL2+ Modem for up to 24Mbps download speeds, advanced *Safe&Secure™* SPI Firewall to keep you safe while online, robust 802.11g WiFi Access Point with enhanced *SignalSafe™* encryption and a super fast built-in 4-Port Fast Switch for connection to legacy PCs, Servers and Media Centres.

Setup the Router is child's play thanks to the new improved *EzeSetup™* configuration manager with Web-based context help menus. Never before seen at this low price point are features that really set the **R-ADSL-C4WG2** out from the crowd including Quality of Service (QoS) functionality, Virtual LAN (VLAN) support, UPnP and Parental Control lists.

Ask you Dynamode distributor now for great pricing on the **new R-ADSL-C4WG2** Wireless ADSL Router – *only from Dynamode*
