

# SW480010-R

48-Port Fast Ethernet High-density Switch

## Higher Density Switching. For less.

Introducing the cost-effective solution for increasing network ports in reduced enclosure form factors.

Offering truly excellent per-port value for money, the new Dynamode **SW480010-R** offers high-density 48-Ports Fast Ethernet in a robust all-metal 1U high design.

Featuring business-class features such as fast 'Store and Forward' packet forwarding for reduced line errors, non-blocking wire speed filtering, large 8K MAC Address routing table and full-duplex flow control, the **SW480010-R** is your ideal solution for when you need maximum network expansion for your LAN but have limited existing 'U space' for adding further Switches.

Silent in operating with integral Power Supply with a premium semi matt finish, the **SW480010-R** comes complete with colour-coded Rackmount Brackets and rubber feet if the Switch is to be deployed on a desktop but still maintain efficient cooling throughout. Ideal for Business, Public Sector and Education.

Available now from your Authorized Dynamode Distributor.
