

BR411NT

802.11n Wireless Cable Broadband Router

Empowering your information Super Highway

Are you looking for the latest Wireless networking technology with advanced and easy-to-use features without the hefty price tag? Introducing the new Dynamode **BR411NT** 802.11n Wireless Broadband Router for Cable customers*

The **BR411NT** comes with an integral 802.11n Wireless Access Point (AP) which allows up to x4 the speed and Wireless distance than regular 802.11g, its ideal for those frustrating Wireless dead spots around the home. With Wireless speeds of up to 150Mbps means you and the family can now enjoy HD ready video streaming from your favourite provider without those annoying dropped frames or frequent buffering. Gamers and intensive local applications will also notice improved performance with enhanced frame rates and quicker 'surfing, Email and other normal Internet duties such as Video Chat and VoIP.

Your security is also taken seriously. The 'always-on' Firewall with Parental Control for Websites keeps you and your family safe while on-line, coupled with advanced features for the more advanced Internet user such as Port Forwarding and QoS. And with the **BR411NT** you don't need to be an expert to get up and running. A truly easy-to-use Setup allows most users to be up and running in minutes and enjoy Wireless free Internet – *anytime!*
